June 29th, 2020

Leger

METHODOLOGY

Web survey using computer-assisted Web interviewing (CAWI) technology.

From June 26th to June 28th, 2020

1,524 Canadians and 1,005 Americans, 18 years of age or older, randomly recruited from LEO's online panel.

Using data from the 2016 Census, results were weighted according to gender, age, mother tongue, region, education level and presence of children in the household in order to ensure a representative sample of the population.

No margin of error can be associated with a non-probability sample (Web panel in this case). However for comparative purposes, a probability sample of 1,524 respondents would have a margin of error of $\pm 2.51\%$, 19 times out of 20, while a probability sample of 1,005 would have a margin of error of $\pm 3.1\%$, 19 times out of 20.

The research results presented here are in full compliance with the CRIC Public Opinion Research Standards and Disclosure Requirements.

METHODOLOGY

Notes on Reading this Report

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

In this report, data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion than that of other respondents.

A more detailed methodology is presented in the appendix.

If you have questions about the data presented in this report, please contact Christian Bourque, Associate and Executive Vice-President at the following e-mail address: cbourque@leger360.com or Jack Jedwab, President & CEO of the Association for Canadian Studies: jack.jedwab@acs-aec.ca

IN THE NEWS
CANADIAN VS AMERICAN PRIDE

CTC153. Given all that has gone on the last three months with the COVID-19 pandemic are you more or less likely to find some way to celebrate Canada Day this year, even if it's just a small gathering with immediate family or a few friends?

Base: All respondents (n=1,524)

	TOTAL CANADA	ATL	QC	ON	MB/SK	AB	BC	18-34	35-54	55+	Urban	Sub-urban	Rural

ANNEXES

DETAILED METHODOLOGY

Sampling Frame

Participants were randomly selected from LEO's online panel.

Leger owns and manages an Internet panel that includes more than 400,000 Canadians coast to coast. An online panel consists of Web users profiled according to different demographic variables. The majority of Leger's panel members (60%) were randomly recruited over the phone in the past ten years, which makes this panel very similar to the current Canadian population on a number of demographic characteristics. Moreover, 35% of panellists were recruited through affiliate programs and 5% through partner campaigns and programs.

To be eligible, respondents were required to be 18 years of age or older.

DETAILED METHODOLOGY

Weighted and Unweighted Sample

The table below presents the Canadian geographic distribution of respondents before weighting.

Province	Unweighted	Weighted
British Columbia	152	207
Alberta	126	171
Manitoba/Saskatchewan	125	100
Ontario	607	585
Quebec	414	358
Atlantic	100	104

The table below presents the American geographic distribution of respondents before weighting.

US region	Unweighted	Weighted
NorthEast	210	179
MidWest	187	217
South	315	372
West	290	233

DETAILED METHODOLOGY

Weighted and Unweighted Sample for Canada

The following tables present the demographic distribution of respondents according to gender, age and language (mother tongue) for Canada.

GENDER	Unweighted	Weighted
Male	797	740
Female	727	784

AGE	Unweighted	Weighted
Between 18 and 34	441	416
Between 35 and 54	515	511
55 or over	568	597

LANGUAGE (MOTHER TONGUE)	Unweighted	Weighted
English	906	999
French	387	317
Other	230	207

The sample thus collected has a minimum weighting factor of 0.0910 and a maximum weighting factor of 3.8525. The weighted variance is 0.3744.

DETAILED METHODOLOGY

Weighted and Unweighted Sample for The United States

The following tables present the demographic distribution of respondents according to gender and age for The United States.

GENDER	Unweighted	Weighted
Male	500	487
Female	505	518

AGE	Unweighted	Weighted
Between 18 and 29	116	221
Between 30 and 39	178	173
Between 40 and 49	167	187
Between 50 and 64	315	251
65 or older	229	173

The sample thus collected has a minimum weighting factor of 0.0910 and a maximum weighting factor of 3.8525. The weighted variance is 0.3744.
