Introduction and Methodology

On the morning of July 5th Montreal police in riot gear removed protesters out of a pro-Palestinian encampment in Victoria Square and on July 10th after 2½ months of courtroom pleadings, acts of vandalism, counter-protests and talk about divestment, on provincial police and security officials took down the pro-Palestinian encampment that had been on the Montreal downtown campus since April 27. According to a Leger survey for the Association for Canadian Studies the removal of the encampments at McGill and Victoria Square was approved by some 70% percent of Canadians with some 13% disapproving (and 17% didn't know or preferred not to answer). Some 1784 respondents were surveyed by Leger for the ACS and while a margin of error cannot be associated with a non-probability sample in a panel survey for comparison purposes, A probability sample of 1784 respondents would have a margin of error of $\pm 2.5\%$, 19 times out of 20
